

# Alternative Schedule of Reinforcement

**EITHER**

**OR**

Provides reinforcement whenever the requirement of **EITHER** a ratio schedule **OR** an interval schedule (the basic schedules that comprise the alternative) is met, regardless of which of the component schedule's requirements is met first. [Cooper et. al., 2007](#)

## FR10 FI3

You would receive reinforcement for 10 responses, **or** the first response after 3 minutes. **Sometimes** these schedules are signaled by an Sd, but not always.
